Notification for Establishment of Self- Affirmed GRAS Status  
for Low Aluminum Calcium Silicate FLORITE® H

Tomita Pharmaceutical Co., Ltd.

Dear Valued customer,

This letter serves as formal notification that Tomita Pharmaceutical Co., Ltd. has established anew the status of self-affirmed GRAS (Generally Recognized as Safe) for low aluminum Calcium Silicate "FLORITE® H" which is the unique multifunctional food additive, in the United States.

By far Calcium Silicate has been a GRAS approved anticaking agent of which used to be utilized within 2% for all the foods or 5% for baking powder.

From the establishment of Self-Affirmed GRAS Status, "FLORITE® H" can now be utilized as a liquid carrier in dietary supplement at use levels of up to 50% of Calcium Silicate by weight of the dietary supplement in the United States.

"FLORITE® H" offers excellent liquid absorbency and compressibility same as "FLORITE® R" and "FLORITE® PS-10". In particular, it achieves low aluminum in response to the growing movement mainly in Europe to control aluminum levels in food ingredients.

We trust the new achievement above accelerates to spread "FLORITE® H" as liquid carrier in dietary supplements, into not only the United States but also European and the other countries.

We highly appreciate your interest in our "FLORITE® H".
