Notification for Establishment of Self- Affirmed GRAS Status for Free-Flow Calcium Silicate FLORITE® PS-200

Tomita Pharmaceutical Co., Ltd.

Dear Valued customer,

This letter serves as formal notification that Tomita Pharmaceutical Co., Ltd. has established anew the status of self-affirmed GRAS (Generally Recognized as Safe) for free-flow Calcium Silicate fine granules "FLORITE® PS-200" which is the unique multifunctional food additive, in the United States.

By far Calcium Silicate has been a GRAS approved anticaking agent of which used to be utilized within 2% for all the foods or 5% for baking powder.

In addition to other "FLORITE®" products, from the establishment of Self-Affirmed GRAS Status, "FLORITE® PS-200" can now be utilized as a liquid carrier in dietary supplement at use levels of up to 50% of Calcium Silicate by weight of the dietary supplement in the United States.

"FLORITE® PS-200" offers excellent liquid absorbency and compressibility same as other current "FLORITE®" products. In particular, it offers high flowability and compatibility in direct compression process and continuous manufacturing system.

We trust the new achievement above accelerates to develop advanced formulation design with "FLORITE® PS-200" as liquid carrier in dietary supplements, to enhance human health.

We highly appreciate your interest in our "FLORITE® PS-200".
